ARTEMII K.

Middle Front-End Web Developer

SUMMARY

Front-end developer with 5 years of the overall experience. Artemii's passion now is the Vue.js framework, and he knows everything about it. He describes himself as an experienced JavaScript Engineer with a synergy of great development and business touch.

TECH STACK
/years

Vue.js 3+   JavaScript 5

Other Technologies:

Nuxt.js, Nginx, Docker, HTML/CSS, TypeScript, React.js, Cypress, GraphQL, RxJS, Bootstrap, SASS/SCSS, Jest, Angular.js, Webpack

EXPERIENCE HIGHLIGHTS

Integration (Dec 2021 - Ongoing)

Integration is a service that helps build fully customizable native integrations with dozens of third-party apps 10x simpler and faster. Pretty much any company needs to integrate with other services — CRMs, email services, etc. — and with Integration one can integrate with the Integration API once and use other supported integrations fast and easy.

Role:

JS (Cypress) contractor

Accomplishments:

- Developed the Cypress E2E system from scratch and integrated it into the CI/CD flow

Routine tasks:

- Enhanced the E2E system by covering more cases, removing flakiness, optimizing the flow, etc.
- Was engaged in the BE development in Node.js a bit later — specifically in the CRM connectors

Tech Stack: React, JavaScript, Typescript, Node.js, MongoDB, Cypress, GitHub Actions

Globality (Nov 2021 - Ongoing)

Globality revolutionizes the way your company sources and buys services by utilizing artificial intelligence to unlock cost savings, efficiency gains, and drive remote collaboration from anywhere. Globality Team revolutionizes how your company finds and selects the best service suppliers at the right price, while at the same time enabling greater economic inclusion around the world.

Role:

Senior Software Engineer

Accomplishments:

- Was in charge of the FE-side of the company's transition to a new file management system

Routine responsibilities:

- Supported and developed the product's core codebase
- Consulted other teams on Cypress-related topics

Tech Stack: React, HTML/CSS, Typescript, JavaScript, Jest, GraphQL

CodeNotary (Dec 2020 - Oct 2021)

A software which restores trust and integrity in digital solutions by making it possible for organizations to keep tamper-proof, indelible, and immutable ledgers of transactions and data transitions.

Role:

Front-End Developer

Accomplishments:

- Complete Node SDK transition to support the new version of the immudb

Day-to-day activities:

- Migrated the codebases across different projects to TypeScript
- Performed refactoring
- Maintained both open-source Node SDKs(the immudb and the CNLC ones)
- Continued the development of features across projects

Tech Stack: Nuxt.js, Node.js, Vue.js, Typescript, ES6+, Vuetify, gRPC, Jest, Cypress

Upwork (Feb 2020 - Nov 2020)

Development and support of all the billing- and payments-related pages and systems on the Upwork site and back-office applications.

Role:

Front-End Developer

- Migrated the old code bases and covered them with tests
- Performed bug fixing
- Developed new features
- Analysed performance
- Performed refactoring
- Created an internal testing library

Tech Stack: Vue.js, Nuxt, Symfony, Jest, Cypress, Angular.js

Straal (Mar 2018 - Feb 2020)

A payments processor startup.

Role:

Front-End Developer

- Developed reusable components
- Covered the code with both E2E and unit tests
- Performed code splitting
- Performed refactoring
- Helped with the creation of an internal E2E testing library

Tech Stack: Vue.js, SASS, vue-rx, ESLint, Prettier, Sentry, D3.js, C3.js, Lodash

Megadrive (Mar 2017 - Aug 2018)

An online sports apparel retailer operating in Ukraine that specialized in professional apparel and accessories.

Role:

Front-End Developer

Accomplishments:

- Developed the entire back-office front end consisting of various widgets for internal processes

Day-to-day activities:

- Supported application's front end

Tech Stack: jQuery, Angular.js

CreatorIQ (Dec 2016 - Feb 2018)

An influencer marketing system that connects brands across industries with social media influencers. The product had all the features imaginable needed for brand cooperation, except for payments, such as influencer profile, table views, reports, user management, etc.

Role:

Front-End Developer

- Supported existing functionality
- Implemented new features
- Provided support for high severity bugs

Tech Stack: Backbone.js, jQuery, Marionette.js, Angular 5

TimeGuard (Jul 2016 - Dec 2016)

A task tracking desktop application developed by QArea, which had an integration with Redmine and was dedicated to the developers who can manage, track progress and provide proofs of their work (screenshots) right from the application

Role:

Front-End Developer

- Supported and developed both existing and new features of the product
- Connected the Electron app to the Redmine's API
- Implemented basic functionality: showing the extracted data, interaction with the activities, monitoring the activity and showing its analytics afterwards

Tech Stack: Electron, SCSS, Angular.js

EDUCATION

National Technical University "Kharkiv Polytechnic Institute"

Master's
Artificial Intelligence

2018
