years of
experience

SUMMARY

Meet a Senior Back-end Ruby/Ruby on Rails Developer with rather extensive object-oriented design and coding experience. Anonyo has been building new features from scratch for years, starting from an idea to the full implementation, yet he's masterful in operating with the existing large-scale codebase. He also has experience supporting other engineers, acting as the Technical Lead for 3 years. On top of that, Anonyo is known to be extremely passionate about his job and is sure to find a perfect degree of complexity and make things work smoothly. Undoubtedly, he has got all experience and knowledge for this position and is ready to bring his expertise to a project.

TECH STACK

/years

Ruby on Rails 8 Ruby 8

Other Technologies:

React, PostgreSQL, AWS, Angular, CSS/HTML, REST API, GraphQL, Redis, GitHub Actions, Docker, Typescript

EXPERIENCE HIGHLIGHTS

Rewind (Oct 2020 – Ongoing)

Rewind backs up data for SAAS platforms if the customer has a data loss. Rewind lets them restore their data.

Role:

Senior Software Engineer

- Built and designed a prototype for the next phase of Rewind;
- built a core component in a service-oriented architecture from scratch using Ruby on Rails;
- unblocked and assigned work to other team members;
- conducted technical interviews;
- mentored and guided junior team members;
- built front-end features with React / Ajax / Rails views.

Tech Stack: Ruby on Rails,AWS,Docker,GitHub Actions,PostgreSQL,Redis

Samsung Ads (Mar 2019 – Oct 2020)

Powering the admin for ad campaigns for one of the largest ad providers in the world.

Role:

Software Engineer / Tech Lead

- Developed full-stack web application with React, which processed, analyzed, and rendered data for their trading platform;
- liaised closely with QA, back-end developers, front-end developers, and product owner as needed;
- delivered multiple time-sensitive features, including business changes and database upgrades;
- refactored code for various features of the application for both UI and backend to reduce UI latency;
- wrote unit tests for UI (React), GraphQL, and Rails backend using Rails Minitest and React Testing Library;
- designed and discussed application architecture and followed Agile (Scrum);
- mentored other developers;
- came up with application architecture for new features;
- conducted technical interviews of new candidates.

Tech Stack: Ruby on Rails,React,GraphQL,PostgreSQL,Redis,REST API

Koolicar / OpenFleet (Oct 2015 – Mar 2019)

Koolicar was a peer to peer car sharing application, similar to AirBnb.

Role:

Software Engineer

- Developed full-stack web application with React and Rails views;
- rewrote and automate the financial payment system;
- wrote, tested (RSpec), and documented API endpoints for mobile and web;
- developed strategies to scale the application;
- optimized and created background jobs to handle complex business logic;
- performed code reviews;
- optimized slow/inefficient queries;
- wrote rake tasks;
- built/evolved Admin section;
- mentored junior developers.

Tech Stack: Ruby on Rails,React,PostgreSQL,REST API

Dynamo (May 2014 – May 2015)

Dynamo was a Ruby focused e-commerce agency.

Role:

Back-end Developer

- Worked mostly on e-commerce and CMS-based applications;
- designed and built new features;
- tracked and fixed complex application bugs;
- updated JS and ruby syntax on legacy projects;
- provided estimates to clients and kept the team up to date with daily morning stand-ups;
- upgraded applications;
- scaled and refactored existing features.

Tech Stack: Ruby on Rails,PostgreSQL,Angular,CSS/HTML

EDUCATION

Cardiff School of Management, UWIC

Bachelors
Business Administration

2010
