## Strong senior Mobile Developer

7

[↗ code sample](#)

years of experience

### SUMMARY

Higor is a seasoned mobile developer with a strong background in building cross-platform apps.

Having experience with various technologies such as Kotlin, Swift, and Java, Flutter has remained his core stack for the last few years.

Higor cares about clean code, likes contributing to architectural decisions, and has a business-oriented approach. He has also worked on security-first projects, gained expertise in developing payment solutions, and taken leading positions.

Among all, Higor has experience with creating packages and native coding for the Flutter app, which makes him the kind of engineer to rely on the project with any degree of complexity.

### TECH STACK

/years

Dart 4 Flutter 4 Android 5

Other Technologies:

Java, iOS, Swift, Kotlin, Firebase, GitHub, GraphQL, Design system, Web Sockets, Typescript, JavaScript, BloC architecture, C#
