EXPERIENCE HIGHLIGHTS

Under NDA (Sep 2021 - Ongoing)

Design, integrate, and automate document workflows using a single platform. From document generation to contract negotiation, eSignatures and payments - configure an infinite array of business workflows in minutes with an all-in-one, no-code solution.

Role:

Senior front-end engineer

- Setup and introduced unit testing processes;
- Proposed new architectural solutions;
- Refactored big legacy modules to new ones;
- Conducted technical interviews;
- Code reviews;
- Implemented UI modules;
- Created interactive web UI;
- Created folder/project views;
- Created UI modules/packages;
- Changed old legacy solution, proposed new architectural solutions.

Tech Stack:

React,Storybook,Jest,JavaScript,Docker,REST API,Unit testing

Ramo (Mar 2022 - May 2022)

It is a non-commercial social startup for Ukrainian refugees. The main idea of the app is to help find useful connections between Ukrainian community all over the world, provide and consume services.

User can create an announcement and search for other users' announcements. When creating user can add geolocation and tags. When searching users can apply filters by location/city/nearby, and tags. Users can connect and communicate via these announcements.

Role:

Tech Lead

- Setup back-end and front-end part of the application
- Implemented backend architecture
- Setup database, postgis extension
- Set up error logging
- Set up analytics (Segment)
- Created REST endpoints
- Set up CDN
- Set up s3 bucket
- Set up Digital Ocean hosting
- Worked with react native (expo)
- Review code
- Took part in UI/UX creation
- Created technical descriptions, analyzed business requirements

Tech Stack: React

Native,Node.js,Typescript,TypeORM,PostgreSQL,PostGIS,Nest.js

SalesLoft (Jun 2019 - Jun 2021)

It is one of the biggest sales engagement platforms. There is a web application, mobile, and the browser extension.Makes sales processes experience better and more efficient. Helps to optimise process, increases managers productivity, helps to find new customers, analyse working performance.Gives convenient features to setup meetings, calls with the customers.Set sales cycle flow.Helps to track calls and emails.Integrates with other platforms.

Role:

Software Engineer

- Created interactive web interfaces;
- Designed the architecture;
- Implemented UI npm packages;
- Fixed bugs;
- Implemented specs;
- Did code reviews;
- Set up CI/CD process;
- Worked with chrome extension API;
- Achieved memory and performance optimisation;
- Took part in a software development planning and estimation;
- Participated in multinational meetings and demos.

Tech Stack: JavaScript,React (v.16+),Redux,Redux Thunk,Angular JS,Elixir,psql,Redis,Kafka,Ruby on Rails,Typescript

Estate Manager (May 2019 - Oct 2019)

A small application for managing rented rooms in office building.

Helps to keep track of free and occupied premises. Maintain bookkeeping, monitor payments and bills.

Role:

Software Engineer

- Set up database
- Created architecture
- Implemented back and front end solution from scratch
- Set up hosting

Tech Stack:

JavaScript,React,Node.js,psql,Sequelize ORM
