SUMMARY

Meet a Senior Mobile Developer that stands out for his extensive development experience and the ability to communicate competently on technical topics. Everything related to developing mobile applications using React Native is his forte. In addition, Mykyta is a confident team player, team leader, and real expert in the crypto domain.

Apart from the technical side, he possesses fluent conversational English and outstanding soft skills, such as open-mindedness, communication, accountability, and problem-solving skills.

TECH STACK

/years

React Native 5

Other Technologies:

HTML/CSS, Typescript, Java, Swift, Redux, Apollo Client, Reanimated 2, React Native Gesture Handler, Google Analytics, React Native Biometrics, React Native Keychain, React Hooks, React Query, Redux Toolkit, Google Maps API, Geolocation, Unit Tests, Axios, Redux Saga, ESLint, Prettier

EXPERIENCE HIGHLIGHTS

Puls App (May 2022 – Sep 2022)

Puls is a German FinTech startup that brings financial management of companies' finances to a different level: AI is overseeing your expenses & incomes, suggests tips, and predicts future earnings.

Role:

Lead Developer

- Built the app from scratch;
- created components library using storybook;
- wrote unit and integration tests;
- managed pipeline deployment;
- committed hooks.

Tech Stack: React Native

BlockEarner (Nov 2021 – Sep 2022)

BlockEarner is a Web3 startup aiming to bring banking to another level, backed up by DeFi. Users can deposit fiat into different assets: Aave, Compound, Gold, BTC, and ETH.

Role:

Team Lead

- Led a team of 3 developers;
- created an app completely from scratch;
- implemented design system together with designers;
- created architecture of backend endpoints together with back-end developers.

Tech Stack: React Native

Moneyveo (Dec 2020 – Nov 2021)

Moneyveo is the biggest PDL company in Ukraine, having 1M+ users over the country. The mobile app lets users choose a loan amount and period and sign a contract.

Role:

Team Lead

- Built an architecture to support different countries;
- led a team of 5 devs;
- setup whole development process: from designers' state of finished work to deployment on production.

Tech Stack: React Native

Moneyveo: Veomini (May 2020 – Dec 2020)

Veomini was an experiment app from Moneyveo to impact younger audiences. It was created only as a mobile app and offered limited loan amounts. The app is now shut down.

Role:

Middle Developer

- Managed architecture setup: Typescript;
- wrote unit tests;
- deployed pipeline with AppCenter;
- managed production releases.

Tech Stack: React Native
