

ROMANI. Senior Mobile Developer

\$67/h.

project with Lemon.io

8 years of experience

SUMMARY

/years

TECH STACK

iOS 7

project.

Other Technologies:

C, WatchOS, Unit testing, Twist, Metal, CarPlay, ARKit, tvOS, SQLite, SwiftUI, Firebase, AWS, Blockchain

REST API, Core Data, Kotlin, Core ML, Objective

Roman is a Senior Mobile Developer with over 7

years of commercial experience with iOS/Swift.

His personality, along with his excellent hard

skills and deep understanding of the business

niche, makes him an outstanding expert for your

Swift 7

HIGHLIGHTS

EXPERIENCE

Fintech department of one of the largest

First Ukrainian International Bank (Apr 2020 -

Ukrainian banks (since 1991, 1.8M clients): IOS app ~ 250k active users, 4.8 scores on App Store, crash-free rate: ~99.7%. Role:

iOS Chapter Lead

Apr 2022)

Responsibilities included, but were not limited

to: Interview and new members onboarding;

- for chapter members;
- App scalability and stability; • Project roadmap and tech dept strategy;

• Assessment and individual development plans

- Rules and standards of development,
- technological stack; • Evaluation and implementation of business
- tasks.
- Among Roman's achievements: • Scaled team size from 3 to 17 members;

Moved from a monolith to a modular

process;

- architecture and a feature team; • Moved to Trunk-based Development + firebase remote config;
- Fixed memory management problems and improved app stability (from 98.4 to 99.7 %); • Reduced time-to-market time through system
- design development (at least 15%); • Optimized CI/CD workflow and improved release
- Reduced build time of the project by more than 20%; • Developed craft and skills matrix for IOS
- Chapter; • Increased the level of cybersecurity of the mobile application.
- Tech Stack: Swift, Unit testing, Core Data, Tuist
- Coding Architects (Dec 2019 Apr 2020)

German startup in the fashion industry to measure

Role:

foot size with Augmented Reality

IOS Developer • Developed custom solution for feature points

detection in front camera frames (based on -

Harris corner detection algorithm); • Developed own score system (based on feature

- points, contrast value, light condition, etc.) to detect the best camera in real-time (works really fast);
- Improved ARKit behavior in lousy light conditions - drifting and Depth Map problems; • Fixed memory management problems and created a crash catcher layer that stored the last Stack Trace.
- STM4 (Jan 2019 Dec 2019)

Worked on apps for one of the biggest German

television news channels, "n-tv." Support

Tech Stack: Swift, SceneKit, Metal, CoreML, ARKit

existing apps (IOS, iPadOS, watchOS, tvOS) and develop new features + the CarPlay app.

Tech Stack: Swift, Objectice-

C,CarPlay,watchOS,tvOS

Role: IOS Developer • Developed apps for Apple ecosystem like CarPlay, tvOS, and watchOS;

• Converted Objective-C code to Swift.

App for truck drivers. USA product company

Ezlogz Inc (Dec 2017 - Dec 2019)

• Solved architecture and performance problems;

specializing in fleet-management services and (ELD) electronic logging devices in USA and Canada. The app was rated 4.4 out of 5 stars on the overall user experience.

Role: Mobile Developer • Rewrote connection logic for ELD - it was

about connection issues. Connection workflow consists of many stages and depends on user type. Roman developed new logic based on NSOperation and NSOperationQueue + smart error handling logic; • Developed several dozens of new screens with custom UI components;

• Created layer (based on Lua programming

along the route (within a certain radius); • Communicated with app customers via the Support channel and helped them solve

language + swizzling) that helped to resolve

- Worked on an Android project and wrote new functionality for the app on both platforms. Tech Stack: Swift, Objective C, Kotlin, Java, Blockchain
- Master's degree Systems Engineering

Vasyl Stefanyk Precarpathian National University

Ivano-Frankivsk National Technical University of
